IMPORTANT BULLETIN!
LLT00014 (NCS14) DOCUMENTATION
UNSUPPORTED FEATURES

In this software release, LLT00014/NCS14, you will find references to the following
unsupported hardware, applications, and features in some of the DMS-500 documentation.

- Series 20-50 Processor
- Mixed Memory
- MSB7
- INODE
- Billing Server (AP/FP)
- EOPS
- FlexDial
- SL-100 Integrated Peripheral Equipment (IPE) digital phone
- AFT on EIU
- Multi Point Code Support
- Wireless on Wireline (WoW)

DMS-500 software is made up of local features of the DMS-100 and long distance
features of the DMS-250. The NTPs, and other technical documents issued with each
software release, include information on new software features and new hardware
introduced with the release. NTPs that do not require revision, but are still pertinent to the
DMS-500 switch, are also included with each release.

Remember: Although documentation or references appear in the NTPs, the features,
applications, and hardware listed above are **unsupported** on the DMS-500 switch.
